PROFILE

I am a full stack developer from Fort Mill South Carolina. I develop websites using frameworks such as vue and react. I have experience working as a solo contractor for a local and as a member of a team of a nation wide staffing company. I am graduating from BYUI in April 2024 with a BS in Software Engineering and a certificate in Web Development. In my free time I enjoy mountain unicycling with my friends, and Camping in Lynnville NC. Feel free to check out my website below where you can learn more and view my full portfolio.

SKYLER SIMPSON

Full Stack Web Developer

EDUCATION

Brigham Young University Idaho 2020-2024
BS, Software Engineering, Certified in Web Development
GPA 3.2

SCHOOL EXPERIANCE

24 hour Hackathon Event *Oct 2023*
• Created A coding Language Website for Children in 24 hours with my team.
• This Website used basic language and provided tutorials for kids to learn how to program with text rather than block coding.

Web Services Final Project *April 2023*
• Developed a web version of the popular game code names and its expansion codenames Duet.
• The project is hosted using Netlify and Mongo DB to maintain the web page and the Database, the routes can all be seen using swagger.

WORK EXPERIENCE

Stone Crest Suites : Web Full Stack Developer *Aug 2023–Jan 2024*
• Developed a full stack webpage that allowed users to reserve office space.
• Implemented director privileges, allowing directors to add office space and edit office amenities.
• Used Netlify, Render, and MongoDB as my hosting services.

OnDiem Dental Staffing: Front End Developer *Jan 2024–PRESENT*
•Contributed to the creation of OnDiems staffing website through sprint plannings and ticket completions.
• Used Vue to create new components and update existing components.
• Gained experience working on a larger development team and working for a company.
