Summary

Full Stack Developer with 3+ years of professional experience and 10 years of hands-on software development experience building responsive web and mobile applications with Vue.js, React, JavaScript, TypeScript, HTML5, and CSS3. Experienced in production development, REST API integration, component-based architecture, debugging, and agile collaboration. Experienced with agent loop development and AI product integrations.

Technical Skills

- Frontend: Vue.js, React, TypeScript, JavaScript, HTML5, CSS3, SCSS, Responsive UI, Component Architecture
- State Management & APIs: REST APIs, Axios, Asynchronous Data Handling, Form Workflows, Front-End State Management
- BackEnd: Django, Python, Node.js, Express, Prisma, Sequelize, SQL, PostgreSQL, MongoDB, External APIs
- Tools and Platforms: Git, Vite, NPM, Webpack, Netlify, Render, Vercel, Docker, Figma, CI/CD Familiarity
- Development Practices: Agile Development, Unit Testing, Debugging, Technical Documentation, Cross-Functional Collaboration, Performance Optimization, Ralph Loops

Experience onDiem

Jan 2024 - Present

Full Stack Developer Columbia, SC

- Built and maintained production self-service workflows across onboarding, credentialing, subscriptions, public partner pages, and admin tools using Vue.js, JavaScript, REST APIs, and reusable UI patterns.
- Developed responsive Vue.js components and integrated RESTful APIs using Axios, delivering consistent user experiences across web and mobile surfaces while improving workflow usability.
- Analyzed product and technical requirements with designers, developers, and business stakeholders to turn complex operational processes into maintainable front-end features.
- Created reusable component patterns and documented implementation approaches so design and development teams could ship consistent UI behavior across related workflows.
- Supported release processes for production applications, including app store submissions, regression checks, issue triage, and cross-functional coordination for on-time delivery.
- Debugged and optimized Vue.js components, data flows, and Rails-backed application behavior using Vite and browser tooling, reducing defect turnaround time in an agile environment.

Stonecrest Rentals

Aug 2023 - Jan 2024

Full Stack Developer Fort Mill, SC

- Designed and developed a responsive office booking platform using React, Node.js, Sequelize, and modern JavaScript, translating client requirements and Figma designs into maintainable user-facing workflows.
- Built dynamic admin dashboards with role-based access control and reservation management functionality, allowing managers to view and edit bookings in real time.
- Integrated front-end views with backend APIs and optimized data flow between client and server systems, improving page responsiveness and reliability.
- Collaborated directly with stakeholders to clarify requirements, review designs, document API behavior, and deliver iterative updates against project priorities.
- Improved maintainability through reusable component design, clean coding practices, source control discipline, and deployment workflows across Netlify and Render.

Education

2020-2024

Brigham Young University Idaho

Bachelor's Degree

- Built full-stack applications using React, Vue.js, JavaScript, Node.js, and Express
- Designed custom components and responsive UIs with HTML5, CSS3, SCSS, and Tailwind CSS
- Deployed and maintained projects using Netlify, Heroku, Vercel, and Render
- Worked with relational and NoSQL databases including PostgreSQL, MySQL, and MongoDB
- Gained proficiency in Prisma and Sequelize ORM tools for managing database schemas
- Received my Web Development Certificate
