

Skyler Simpson

Columbia SC | (803)-504-2034 | skylerjsimpson@gmail.com | [Linked in](#) | [github](#) | [profile](#)

Summary

Full Stack Developer with 3+ years of professional software development experience and 10 years of hands-on application building experience across TypeScript, JavaScript, React, Vue.js, Node.js, Python, SQL, and PostgreSQL. Experienced building production web applications, integrating REST APIs, developing reusable UI architecture, debugging full-stack workflows, and collaborating with product, design, and engineering teams in agile environments. Strong foundation in frontend engineering with growing backend experience through production API work, Django/PostgreSQL systems, ETL workflows, and AI-enabled application features.

Technical Skills

- Frontend: React, Vue.js, TypeScript, JavaScript, HTML5, CSS3, SCSS, Responsive UI, Component Architecture
- Backend: Node.js, Express, Python, Django, REST APIs, External API Integrations
- Databases: PostgreSQL, SQL, MongoDB, Prisma, Sequelize, Relational Data Modeling
- Cloud & DevOps: Docker, GitHub Actions, CI/CD Familiarity, Netlify, Render, Vercel, Linux Command Line
- Tools: Git, Vite, NPM, Webpack, Figma, Browser DevTools
- Practices: Agile Development, Unit Testing, Debugging, Technical Documentation, Cross-Functional Collaboration, Performance Optimization, AI Agent Workflows

Experience

onDiem

Jan 2024 - Present

Full Stack Developer Columbia, SC

- Built and maintained production self-service workflows across onboarding, credentialing, subscriptions, public partner pages, and admin tools using Vue.js, JavaScript, REST APIs, and reusable application patterns.
- Integrated frontend workflows with Rails-backed APIs and external services, improving reliability across data-heavy operational processes used by internal teams and customers.
- Developed responsive, production-grade components and form workflows with reusable UI patterns, asynchronous data handling, validation logic, and state-driven user interactions.
- Collaborated with product managers, designers, developers, and business stakeholders to translate complex operational requirements into maintainable software features.
- Debugged production issues across frontend behavior, API data flows, release builds, and environment-specific defects using browser tooling, logs, regression testing, and cross-functional triage.
- Supported full software lifecycle responsibilities including requirements review, implementation, documentation, QA coordination, release support, app store submissions, and post-release issue resolution.
- Contributed to backend-heavy feature work involving data handling, third-party integrations, SQL-backed systems, and production application behavior.
- Documented implementation details and reusable patterns to improve consistency across related workflows and reduce onboarding friction for future development.

Stonecrest Rentals

Aug 2023 - Jan 2024

Full Stack Developer Fort Mill, SC

- Designed and developed a responsive office booking platform using React, Node.js, Sequelize, and modern JavaScript, translating client requirements and Figma designs into maintainable full-stack workflows.
- Built dynamic admin dashboards with role-based access control, reservation management, and real-time booking visibility for internal business users.
- Developed backend API functionality and integrated client-side views with server-side data models, improving reliability and responsiveness across booking workflows.
- Modeled reservation, user, and administrative data using Sequelize and relational database patterns.
- Collaborated directly with stakeholders to clarify requirements, review designs, document API behavior, and deliver iterative updates against project priorities.
- Improved maintainability through reusable component design, source control discipline, deployment workflows, and clean separation between frontend, backend, and persistence layers.

Education

2020-2024

Brigham Young University Idaho

Bachelor's Degree

- Built full-stack applications using React, Vue.js, JavaScript, Node.js, and Express
- Designed custom components and responsive UIs with HTML5, CSS3, SCSS, and Tailwind CSS
- Deployed and maintained projects using Netlify, Heroku, Vercel, and Render
- Worked with relational and NoSQL databases including PostgreSQL, MySQL, and MongoDB
- Gained proficiency in Prisma and Sequelize ORM tools for managing database schemas
- Received my Web Development Certificate
